Table 2: Table of Counts and Row Percentages

1. Among Adelie penguins, 20.5% are classified as underweight.
2. 56.3% of Gentoo penguins are classified as Obese, making it the most common category among them.
3. The majority of penguins in the sample are classified as Normal, comprising 40.2% of the sample.

Species	Underweight	Normal	Overweight	Obese	Total
Adelie	30 78.9%	84 62.7%	32 34.0%	0 0	146 43.84%
